Data Cleaning and Quality Assessment
Homework 5 – Data quality

1 Exercises (100 pts)

1. (100 pts/25pts per task) Oversampled Polls from *Cleaning Data for Effective Data Science*.

2 Extra credit (10 pts)

Present a summary of the outlier detection methods presented in the Data Cleaning textbook (available for free from ECU Libraries).

Submit

Upload to Canvas your solution (`IPYNB` and its corresponding `PDF` file, along with your summary for extra credit), in a ZIP file. Make sure you indicate which answer corresponds to which question (i.e., create section headers in the Jupyter Notebook).
